THE ART OF PERFORMANCE

Every day we push performance to its limit. Our performance. Our cars' performance. We innovate, we engineer, we design. We master rules and then break them. Only to push further. Past the limits of convention. This is when performance becomes art.

Jaguar. The Art of Performance.
Jaguar F-TYPE is the latest in a distinguished bloodline of powerful, agile and distinctive sports cars. Combining exhilarating performance, accomplished handling and cutting-edge technology, it delivers an exceptional driver-focused experience.

F-TYPE’s advanced technology makes it as up-to-date as it is special. The range features the most advanced and efficient engine ever found in an F-TYPE: a 2.0 l 221 kW Turbocharged Ingenium Petrol. While Jaguar’s most powerful infotainment system, Touch Pro, is standard with a highly responsive 25.4 cm (10) Touchscreen. A range of driver assistance features are also available, helping to keep you even safer on every drive.

LED headlights* help make driving at night less tiring as they provide a quality of beam that is closer to daylight. Inside, slim seats save weight and give more space and comfort, while finishers on interior details allow even more personalisation.

F-TYPE is a truly cutting-edge expression of the Art of Performance.

*Optional on F-TYPE. Standard on F-TYPE R-Dynamic, F-TYPE R and F-TYPE SVR.

VEHICLE SHOWN: F-TYPE R-DYNAMIC 2.0 l I4 PETROL IN SILICON SILVER WITH OPTIONAL FEATURES FITTED
F-TYPE - THE FACTS

Stunning design, exhilarating performance, instant response, agile handling and advanced technology. F-TYPE is created to deliver breathtaking driving experiences.

TECHNOLOGY

F-TYPE’s advanced technologies keep you safe, entertained and connected. Park Assist makes parking in a tight spot easier than ever, by steering your car into a suitable space. Our next-generation 25.4 cm (10) Touch Pro infotainment system, with its tablet-style Touchscreen, offers intuitive swipe and pinch-to-zoom navigation.

ALL WHEEL DRIVE

F-TYPE’s All Wheel Drive (AWD) combines the agility and character of Rear Wheel Drive (RWD) with the increased security and traction provided by AWD. In normal driving, F-TYPE is predominantly RWD to deliver handling purity, feel and balance. But when needed the system rapidly redistributes torque to the front axle, enabling F-TYPE to maintain optimum traction in all conditions.

INTERIOR

Weight reduction and driver focus find their balance in F-TYPE. Slimline seats with a lightweight magnesium construction offer improved lateral support and save over 8 kg of weight\(^1\) compared with previous generation models. F-TYPE is as meticulously honed and sporty on the inside as it is on the outside.

\(^1\)Comparative weight saving for Performance seats. \(^2\)Optional on F-TYPE. Standard on F-TYPE R-Dynamic, F-TYPE R and F-TYPE SVR. 
\(^3\)Engine dependent. \(^4\)Only available on F-TYPE R and F-TYPE SVR.

VEHICLE SHOWN: F-TYPE R IN YULONG WHITE WITH OPTIONAL FEATURES FITTED (MARKET DEPENDENT)
DESIGN
Developed with advanced aerodynamics, F-TYPE’s purposeful front end features a bumper framed by LED headlights\(^2\). These elegant headlights adapt the width and depth of their beam to your speed and offer a superb quality of light – so you always have the best possible illumination whatever your surroundings. New to F-TYPE is an exclusive range of 18 bespoke paints available in two finishes, that is available in addition to the core F-TYPE colour palette.

INGENIUM
The Ingenium 2.0 l 4-cylinder 221 kW Turbocharged Petrol engine’s impressive power is balanced with strong fuel economy. For almost instant boost and high efficiency, its low inertia twin-scroll turbocharger features low-friction ball bearings and a mixed flow turbine wheel. Underpinned by the turbocharger’s increased aerodynamic efficiency, the engine delivers rapid acceleration and maximum torque of 400 Nm between 1 500-4 500 r/min.

SUPERCHARGED PERFORMANCE
F-TYPE’s V6 and V8 engines use a twin vortex supercharger to eliminate acceleration lag. Throttle response is instantaneous with seamless power delivery and high levels of torque at all engine speeds. The latest engine to use this technology is the V8 unit found in F-TYPE SVR, which makes it Jaguar’s most powerful production car ever.

HANDLING AND AGILITY
To optimise F-TYPE’s handling and agility, a range of driving technologies are available. These include Torque Vectoring, Adaptive Dynamics\(^3\) and an Electronic Active Differential\(^4\). Each one works to enhance the driving experience through increased control, traction and feel.
"A piece of design should tell a story. F-TYPE’s lines have a start, a direction and a conclusion. Make every line individual and aesthetically correct, with the right dimensions, and a design will stand the test of time."

Ian Callum, Jaguar Design Director

Those bold proportions. Those instinctive curves. Timeless, evocative and progressive in a way that could only be Jaguar.

Some say great design is subjective, but for us there’s no debate: F-TYPE’s beauty is the ultimate expression of the Art of Performance.
Rising vertically from the front spoiler and running up through elongated headlights, F-TYPE’s beautifully flowing body line begins to take shape. The line arcs over the front wheel, descending elegantly as it runs across the door, before culminating in a pronounced muscular rear haunch. Whether you choose Coupé or Convertible, F-TYPE leaves you under no illusion - this is a high performance sports car, the latest in a distinguished bloodline.
It is, in part, sculpted by the wind itself, formed by Jaguar's state-of-the-art Computational Fluid Dynamics design methods. A front splitter beneath the grille and rear venturi manage airflow along the underside, while a deployable rear spoiler* automatically rises at higher speeds to increase downforce and reduce drag. Even the door handles retract when not required, their flush design creating an uninterrupted airflow along F-TYPE's flanks.

*Optional on F-TYPE SVR.
Even at night, F-TYPE stands out. Its LED headlights* featuring LED ‘J’ blade Daytime Running Lights are as powerful as they look. These headlights produce a high quality of light that is closer to daylight conditions, making driving in the dark less tiring.

‘J’ blades complete the dramatic headlight design. These crisp bars of light wrap round each light’s outer edge, giving F-TYPE an instantly recognisable visual signature that adds to its assertive presence and distinctive style.

*Optional on F-TYPE. Standard on F-TYPE R-Dynamic, F-TYPE R and F-TYPE SVR.

VEHICLE SHOWN: F-TYPE R-DYNAMIC AWD IN SILICON SILVER WITH OPTIONAL FEATURES FITTED
LED headlights feature an Adaptive Front Lighting System (AFS). This automatically provides the best possible illumination by adjusting the low beam according to your speed and the weather conditions.

**City Mode**  
A wider beam than a standard low beam to help you see pedestrians and turnings more easily in built-up areas.

**Country Mode**  
A low beam that is narrowed and extended, in comparison to City Mode, to offer better illumination for country driving.

**Motorway Mode**  
A longer and narrower beam than Country Mode to improve long range visibility. The low beam is raised to extend illumination further down the road.

**Bad Weather Mode**  
Adjusts the intensity of the low beam to minimise glare from reflections while still offering strong illumination of the road ahead. It is only activated when the windscreen wipers are in continuous operation.
In F-TYPE you and the car become one. Every aspect of its 1+1 configuration is designed to create a bond. It wraps around you, taking your driving experience to greater heights.

The cockpit provides maximum visibility, minimal distractions and close-to-the-centre-of-gravity seating for a complete connection with the car. The low facia is free from clutter to increase the view ahead.

The active central air vent, part of the advanced climate control system, hides the twin central air vents, which automatically rise from the dashboard as required and retract after use.

F-TYPE’s easy to use 25.4 cm (10) colour Touchscreen is your primary interaction point with the Touch Pro infotainment system. The system responds directly to touch and swipe gestures, providing effortless control over navigation, music, phone, climate and driver assistance features.
AN EXCLUSIVE SPACE

SUPERIOR CRAFTSMANSHIP | A TAILORED SPACE

We design our interiors so that nothing detracts from the outstanding driving experience. You’ll always feel comfortably cocooned in F-TYPE’s exquisitely crafted cockpit. The cabin’s styling expresses exclusivity and refinement while always maintaining driver focus. Every element of the interior is carefully considered, with even the smallest details deepening the sense of luxury, such as the Chrome finishes on the doors and the steering wheel.

F-TYPE’s interior starts with Jaguar’s quintessential British character, but its unique personality is up to you. Tailor your interior styling with a variety of stitches and materials including Windsor leather and suedecloth, as well as Ebony, Pimento, Ivory and Siena Tan colour combinations. It’s easy to make F-TYPE feel truly personal, to make F-TYPE your perfect sports car.
F-TYPE’s Sport and Performance seats have been engineered with sports cars in mind. The lighter magnesium construction of the seats saves over 8 kg of weight* compared with previous generation models. Their streamlined form takes up less space enabling a greater range of seating positions. Performance seats provide increased lateral support during dynamic driving and the option of cooling for greater comfort.

*Comparative weight saving for Performance seats. Sport seats are standard on F-TYPE and F-TYPE R-Dynamic. Performance seats are standard on F-TYPE R and F-TYPE SVR and optional on F-TYPE and F-TYPE R-Dynamic.

VEHICLE SHOWN ABOVE AND RIGHT: F-TYPE R-DYNAMIC AWD FEATURING EBONY WINDSOR LEATHER PERFORMANCE SEATS WITH IVORY CONTRAST STITCH WITH OPTIONAL FEATURES FITTED
We have designed the loadspace of F-TYPE Coupé to create a sports car that fits every lifestyle. With a capacity that is competitive with some well-known family hatchbacks – up to 408 l (and 207 l in F-TYPE Convertible) – F-TYPE Coupé certainly has the space to accommodate two generously sized suitcases for a weekend away. For added ease of access, the tailgate can be opened or closed at the touch of a button with the optional powered function.

*Coupé only.

VEHICLES SHOWN: F-TYPE IN INDUS SILVER AND F-TYPE R-DYNAMIC AWD IN SILICON SILVER WITH OPTIONAL FEATURES FITTED
All of F-TYPE’s engines deliver high levels of torque and a near instantaneous response to your demand for power.

Making F-TYPE’s dynamic performance more accessible is a 2.0 l 4-cylinder 221 kW Turbocharged Petrol engine from our Ingenium range. This highly advanced engine balances maximum driving pleasure with superb efficiency. One in a range of highly-acclaimed supercharged engines: a 3.0 l V6 250 kW, a 3.0 l V6 280 kW, a 5.0 l V8 405 kW and a 5.0 l V8 423 kW.

Every F-TYPE is fitted with an Active Sports Exhaust that creates a race-car inspired crescendo. The exhaust system reacts to throttle position, speed and engine revs by opening active valves. When open, these valves allow exhaust gases to take a more direct, less restrictive route through the rear silencer producing a much richer, more exhilarating sound. The Switchable Active Exhaust* allows you to manually open the exhaust valves so you can enjoy F-TYPE’s stirring soundtrack at all engine speeds.

To improve fuel economy, particularly during urban driving, a fast-reacting intelligent Stop/Start system is fitted to every F-TYPE as standard.

---

*Optional on F-TYPE, standard on F-TYPE R-Dynamic, F-TYPE R and F-TYPE SVR.*
The high performance Ingenium 2.0 l 4-cylinder 221 kW Turbocharged Petrol engine produces 400 Nm of torque and delivers outstanding fuel economy and driveability.

- The intelligent Continuously Variable Valve Lift (CVVL) system varies the extent to which inlet valves are opened, reducing engine pumping losses. This lets the engine 'breathe' with maximum efficiency, optimising power and torque.

- CVVL works in combination with dual independent variable cam timing for ultimate operating flexibility, resulting in excellent power and fuel economy across the rev range.

- The twin-scroll turbocharger is fed by an integrated exhaust manifold which increases the transfer of energy to the turbine - significantly reducing turbo lag and improving engine response.

- The twin-scroll turbocharger features ceramic ball-bearings which reduce friction and improves transient response.
V6 ENGINES

3.0 l V6 Supercharged Petrol engines produce up to 460 Nm of torque for powerful and responsive performance.

- The Roots-type twin vortex supercharger provides linear power delivery and maximises responsiveness.
- A spray guided direct injection system carefully manages the air-fuel mixture in the combustion chamber for improved combustion, extracting more energy from the fuel injected. This results in excellent power, while improving fuel economy and reducing emissions.

- The engine also features dual independent variable cam timing to vary inlet and exhaust valve operation, working alongside lightweight pistons with ultra-low friction piston rings, for increased performance and efficiency.
- A twin, contra-rotating balancer shaft system is employed to maximise refinement; resulting in an engine that delivers power smoothly.

**VEHICLE SHOWN: F-TYPE IN YULONG WHITE WITH OPTIONAL FEATURES FITTED**
5.0 l V8 Supercharged Petrol engines produce up to 700 Nm of torque for top of the range performance.

- The V8 has a compact and lightweight all-aluminium design, with impressively low levels of internal friction.
- The engine has been optimised around a state-of-the-art Bosch engine management system. This features high-pressure direct injection with a centrally mounted, multi-hole, spray-guided injection system.

0-100km/h from 3.7 s
Fitted with a sixth generation, Twin Vortex System (TVS) supercharger the engine offers superior thermodynamic efficiency and extremely refined noise levels. The supercharger fully utilises the additional capacity of the 5.0 l engine, generating a torque profile that delivers outstanding levels of power in a linear and engaging manner.

OUTBOARD MOUNTED QUAD EXHAUSTS
A lightweight aluminium body with a strong, stiff structure is the perfect platform for a sports car. We pioneered this technology over a decade ago and continue to push the boundaries today. It informs every aspect of how F-TYPE performs, handles and feels. A strong, stiff structure provides an inherently stable platform for precise, agile handling and allows the finely-tuned suspension system to deliver connectivity and driver feedback. Lightweight aluminium panels are bonded together with a super-strong adhesive, then punched with zinc-coated, boron steel rivets that compress the adhesive to form an airtight bond for phenomenal strength and rigidity. F-TYPE’s body is the perfect complement to its high-performance engine range. Together they produce the exceptional power-to-weight and torque-to-weight ratios that deliver the real world measures of performance in a sports car.

The exterior panels are made from specially developed alloys. They combine robustness with greater formability, which gives clarity and tightness to curves and feature lines. On Coupé models, the side pressing is one of the most technically advanced in the automotive industry. It allows for cleaner lines with an extraordinarily beautiful, uninterrupted sweep from the front pillar to the trailing edge. This combination of advanced materials and innovative techniques has two advantages. It allows us to reproduce F-TYPE’s crisp, crafted lines exactly as the designers intended. And it delivers a vehicle with extraordinary structural integrity.
ALUMINIUM SUSPENSION KNUCKLES
Designed to optimise stiffness and strength, the lightweight aluminium front and rear suspension knuckles help improve F-TYPE’s agility and responsiveness.

F-TYPE’s Lightweight Aluminium Architecture creates an immensely stable platform from which the forged aluminium double wishbone suspension can control the car. With the damping set-up optimised for the best partnership between dynamics and refinement, it gives the perfect combination of control, agility and feedback.
ADAPTIVE DYNAMICS
Standard on the 3.0 l V6 280 kW and 5.0 l V8 engines, Adaptive Dynamics delivers both composed dynamics and a compliant ride. The system assesses body motion and pitch rates 100 times per second. The steering wheel position is also measured 500 times a second enabling the system to predict F-TYPE’s movements. The stiffness of each damper is then adjusted to maintain body control and agility.

SUSPENSION
Considered by Jaguar as the best configuration for a suspension system, F-TYPE’s forged aluminium double wishbone design offers precise handling and control.
AERODYNAMICS

Aerodynamic performance is at the heart of F-TYPE’s design. It is seamlessly integrated into the body for low levels of lift and excellent stability at high speed. Even the door handles retract to create an uninterrupted airflow along its flanks. The deployable rear spoiler* automatically rises at higher speeds to reduce lift by up to 120 kg. A front splitter beneath the grille manages airflow along the vehicle’s underside, with the sharply defined tail helping to separate air cleanly at lower speeds. The result is improved handling and stability.

*Optional on F-TYPE SVR.

VEHICLE SHOWN: F-TYPE R IN YULONG WHITE WITH OPTIONAL FEATURES FITTED (MARKET DEPENDENT)
792,000 virtual vehicles created to perfect F-Type.

10,000,000 hours of virtual testing, reducing our impact on the environment with significant savings in resource, waste, power and fuel.

19,312 km of extreme track testing on Germany’s infamous Nürburgring race track – equivalent to driving half way around the world.

1,413 liters of recycled water per minute blasted at every car to ensure F-Type is monsoon proof.
F-TYPE first took to the road in the virtual world of Jaguar’s Computer Aided Engineering (CAE) systems ensuring that all components underwent extensive development and testing before being committed to the physical testing process. Engineers produced a series of virtual prototypes to realistically simulate the behaviour of complex mechanical systems allowing them to analyse multiple variations until the optimum design was achieved. For example, using a technique first used in the aerospace industry, aerodynamic testing took place in a virtual wind tunnel with Computational Fluid Dynamics running on high speed supercomputers. During its virtual life, F-TYPE completed half a million analyses, requiring 10 million computer processor hours and creating 300 TB of data. The CAE development process was one of the key contributing factors in delivering F-TYPE’s exhilarating performance and responsiveness.

The real world testing to fine tune the set-up took place in specialist facilities and the harshest environments across the globe in temperatures ranging from –40°C to +50°C, and at altitudes of up to 4 000 m. High-speed stability tests, for example, were conducted at Nardò in southern Italy. The Nordschleife circuit at the Nürburgring in Germany was the perfect location to prove out handling, braking, cooling and durability. Known as the “Green Hell”, and featuring 20.8 kilometres of track with 73 turns, it is renowned as the most demanding circuit in the world and the ultimate test of both car and driver.
**ADVANCED DRIVING DYNAMICS**

**MAXIMISING AGILITY**  |  **CONTINUOUSLY ADAPTING**

Whether you’re accelerating on the motorway, cornering on country roads or navigating around town, optional Adaptive Dynamics modifies F-TYPE’s response to match the conditions and your driving style. It analyses acceleration, cornering, throttle and brake pedal activity as well as kick-down activation. Steering movement is analysed up to 500 times a second, and body movement up to 100 times a second. Electronically controlled dampers then constantly adjust to optimise the suspension settings and maintain F-TYPE’s dynamism and comfort.

**ELECTRIC POWER ASSISTED STEERING**

Electric Power Assisted Steering (EPAS) offers outstanding feedback, control and is active on demand – saving power for where you really need it, as well as saving fuel. This steering system delivers the immediate response and connected feel expected from a Jaguar sports car. Sophisticated computer management varies steering assistance as appropriate – increasing assistance for low speed manoeuvring and improving feel at higher speeds.

---

*Only available with the 3.0 l V6 280 kW engine and 5.0 l V8 engines.*
Engaging Dynamic Mode amplifies F-TYPE’s sporting character. Gearshifts are faster and at higher engine speeds with automatic upshifts prevented if in Manual Mode, throttle response is sharpened, the dampers are stiffened\(^1\) and steering weighting is increased. Dynamic Mode also opens the Active Sports Exhaust for a more thrilling soundtrack and brings visual drama to the cabin – F-TYPE’s instrument cluster and Configurable Ambient Interior Lighting\(^2\) instantly take on a red glow.

The Configurable Dynamics system\(^1\) allows you to personalise F-TYPE’s Dynamic Mode to create your perfect dynamic setup. Via the Touchscreen, four driving characteristics can be changed to Dynamic or left as normal. So whatever combination of throttle sensitivity, gearbox shift points, steering weighting or damper stiffness you want, Configurable Dynamics allows you to set up Dynamic Mode to suit your driving needs.

---

\(^1\)Not available with 2.0 l 221 kW engine or 3.0 l 250 kW engine.

\(^2\)Standard on F-TYPE R and F-TYPE SVR. Optional on F-TYPE and F-TYPE R-Dynamic.
LOW TRACTION CONDITIONS
On slippery surfaces, such as grass and snow, torque can be balanced between the front and rear wheels to maximise traction. In extreme conditions where only the front wheels have traction, up to 100 percent of engine torque can be distributed to the front wheels for optimum grip.

DRY ROAD CONDITIONS
In normal conditions, torque is distributed to the rear wheels, delivering acclaimed Jaguar agility and handling.
F-TYPE’s All Wheel Drive (AWD) combines the agility and character of Rear Wheel Drive (RWD) with the increased security and traction provided by AWD. In normal driving, F-TYPE is predominantly RWD to deliver handling purity, feel and balance. But when roads become more challenging, or when you accelerate more keenly on low-grip surfaces, the system subtly channels power forwards enabling F-TYPE to maintain optimum traction for comfortable progress in all conditions.

F-TYPE’s AWD uses a transfer case at the back of the 8-speed Automatic Transmission to manage the appropriate distribution of torque to the front and rear wheels. Engineered to ensure that F-TYPE retains the dynamic behaviour appropriate for a sports car, the transfer case contains an electro-mechanically activated multi-plate clutch with a smart actuator. Torque is delivered quickly and accurately, via a sophisticated ball ramp mechanism that develops the required force at the clutch, to transfer the optimal amount of torque to the front wheels.

Unlike other systems that react to wheel slip, Jaguar’s Intelligent Driveline Dynamics (IDD) software is predictive and uses sensors measuring throttle and steering inputs to anticipate wheel slip. IDD seamlessly co-ordinates these inputs and compares them with responses from the engine, transmission and traction control systems to calculate the traction available and distribute torque accordingly, even before grip is lost. From a standstill, F-TYPE can transition from RWD to AWD in as little as 165 milliseconds, or just 100 milliseconds when the car is moving.

The result is a drive which blends the character of RWD with the capability of AWD, providing outstanding levels of performance and control whatever the road throws at you.
F-TYPE’s Torque Vectoring maximises capability through even the tightest corners. Torque Vectoring technology provides controlled independent braking of the individual, inside front and rear wheels to add to the turning forces acting on the car. In most conditions more braking pressure is applied to the rear inside wheel as this supports the most increased cornering capability, while the front inside wheel is braked for greater effectiveness and refinement. The result is reduced understeer for sharper turning and more consistent road holding.

Torque Vectoring delivers increased agility and added driver confidence. On F-TYPE R and F-TYPE SVR, Torque Vectoring works together with the Electronic Active Differential system (see page 46), complementing each other to optimise traction and cornering ability as well as maximising steering feel and agility.
Jaguar’s stability systems keep F-TYPE well balanced whether you’re driving enthusiastically or simply require the assurance of a car that will remain stable in challenging conditions. To fully harness their performance potential, and for greater control and traction, a Limited Slip Differential is fitted with the 3.0 l V6 280 kW engine and an Electronic Active Differential is fitted with the 5.0 l V8 405 kW and 423 kW engines.

**Limited Slip Differential:** When a rear wheel has low grip, the Limited Slip Differential transfers torque through a mechanically activated clutch pack to the wheel that has more grip. This limits slip across the axle, improving control and traction for faster, more precise cornering.

**Electronic Active Differential:** Has a higher locking torque capacity to exploit the increased power and torque of the V8 engines. This differential works with the AWD system and Intelligent Driveline Dynamics (IDD) software, as well as F-TYPE’s traction and stability systems, to maximise traction and improve cornering control. Variable electronic control allows this differential to continually adjust locking torque between the wheels – this gives sharper turn in when entering corners and the ability to accelerate sooner when leaving corners because the torque at each wheel is more controllable.
PERFORMANCE BRAKING SYSTEMS

LIGHTWEIGHT  |  POWERFUL  |  DURABLE

A range of braking systems are available, each one engineered to deliver a confident, progressive feel and consistent high performance. The calipers use aluminium to reduce the unsprung mass of the car, benefiting both handling and ride refinement. Each system features large, ventilated brake discs. This large swept area improves braking force as well as providing greater capacity for the discs to absorb and dissipate the heat energy generated during braking.

For more details on brake availability refer to page 88-89 or configure your vehicle at jaguar.in
Delivering a wealth of information and entertainment, every F-TYPE is equipped with our InControl infotainment system, Touch Pro. It features intuitive and advanced integrated technologies to ensure everyone can make the most of their journey.

**TOUCH PRO 25.4 cm (10) SCREEN**
The standard 25.4 cm (10) Touchscreen at the heart of the centre console supports swipe and pinch gestures and delivers our richest ever audio-visual entertainment. To enhance the in-car experience, Touch Pro offers customisable homescreens and fast response times. Multi-tasking is also made easy thanks to the Interactive Side Panel.
**CONNECTIVITY**

InControl is Jaguar’s suite of standard and optional features that connects you to your vehicle and links you seamlessly, and securely, with the outside world. There are a range of packs and options available to choose from. With a selection of apps, even when you’re away from your car, some of the InControl features stay with you, making sure the Jaguar experience is more enjoyable than ever.

**STANDARD FEATURES**

**NAVIGATION PRO**

Standard on all models, Navigation Pro allows you to save your favourite places, use pinch and zoom gestures for simple map exploration and display a choice of either 2D or 3D clear crystal map graphics.

*Search 'Jaguar ReRun'*

**OPTIONAL FEATURES**

**INCONTROL APPS**

Features a range of Jaguar approved apps that can be connected to F-TYPE from your smartphone. It ensures safe and convenient use of apps optimised to enhance aspects of your in-car experience. You can also download third-party apps offering a vast range of services. Applications include:

- **Spotify1** – Access a library of more than 30 million songs with this seamlessly integrated app. Featuring all the same intuitive functionality as the Spotify smartphone app, you can search songs, stations and recommendations, create playlists and access your music in offline mode. Simply log in using your existing Spotify Free or Spotify Premium account.

- **Tile2** – Helps you find lost or misplaced items in seconds. Attach a tiny Bluetooth tracker Tile to your keys, wallet or bag. The easy-to-use Tile app can then help you find these items should they be misplaced. The app is accessible any time through your vehicle's Touchscreen, allowing you to make sure you have everything you need with you, before you set off on your journey.

**CONNECT PRO PACK3**

Connect Pro consists of InControl Apps and Pro Services. It’s designed to enhance your in-car and out-of-car experience, ensuring you and your passengers enjoy the journey whilst remaining connected to the world.

**PRO SERVICES4**

Offers a number of enhanced capabilities designed to help you reach your destination easily:

- **Planning Routes and Door-to-Door Routing** – Before setting off, use the Route Planner app or online to search, save locations or set your destination. The app uses the Cloud to send your destination automatically to your vehicle’s navigation screen. Once you’ve parked, the Route Planner app will guide you to your destination – a true door-to-door experience which includes public transport options.

- **Satellite View** – When you want to get the context of your surroundings from overhead, simply switch to satellite view.

- **Street Level Imagery** – To help you recognise your destination as you approach it, the screen can display a 360° panoramic street level image.

---

1Please check App Store and Google Play for availability. 2Bluetooth tracker tiles must be purchased separately. 2016 Tile Inc. and the Tile design are trademarks of Tile, Inc. 4Certain features require an appropriate micro SIM with a suitable data contract, which will require further subscription after the initial term as advised by your Jaguar Retailer. 4Features within Pro Services may vary between markets. InControl features, options and their availability remain market dependent, please check with your Jaguar Retailer for local market availability and full terms. Information and images displayed in relation to the InControl technology, including screens or sequences, are subject to software updates, version control and other system/visual changes depending on options selected. Mobile network connectivity cannot be guaranteed in all locations.
A vehicle’s cabin is the ideal place within which to experience your personal choice of music and Jaguar F-TYPE has the option of two different audio systems to bring your music to life:

**MERIDIAN™ SOUND SYSTEM – 380 W**
Great definition, crystal clear highs and full, deep bass – delivered through the careful arrangement of 8 speakers and 2 subwoofers.

**MERIDIAN SURROUND SOUND SYSTEM – 770 W**
770 W All the fullness and clarity of a live performance delivered through an arrangement of 10 speakers and 2 subwoofers - seamlessly brought together using Trifield™ technology. Exclusive to Meridian. Trifield perfectly blends the centre and surround channels with left and right channels ensuring an optimum, consistent sound experience for each passenger.

1 Standard on all models. 2 Optional.
MERIDIAN™
Formed in 1977 in Cambridgeshire, England, Jaguar’s audio partner Meridian has pioneered many firsts including active speakers and the world’s first digital surround sound processor. Meridian’s audio technology input has helped ensure that Jaguar F-TYPE is the most superb space within which to experience sound. Meridian Cabin Correction technology was utilised to analyse cabin shape, acoustics and resonance characteristics in order to help remove unwanted sounds. The advanced algorithm ensures that the rhythm, punch and timing of any piece of music are heard precisely how the artist intended, providing a consistently exceptional quality audio experience for all passengers in the vehicle.

DIGITAL SIGNAL PROCESSING
Brings all elements of the audio system together as one, for performance that would otherwise require significantly larger speakers.

MERIDIAN CABIN CORRECTION
The advanced algorithm of Meridian’s Cabin Correction tailors the sound experience to the precise acoustics of F-TYPE’s interior.

MERIDIAN DIGITAL DITHER SHAPING
To maintain the quality of musical recordings, they are converted into a common digital format. Meridian Digital Dither Shaping ensures that digital signal conversions are made smoothly and seamlessly, preserving the finest details of the audio performance. The result is authentic musical conversion, evoking the emotions of the original recording.

TRIFIELD
Exclusive to Meridian, Trifield™ blends the centre and surround channels seamlessly with left and right channels, delivering a consistent, concert-like experience for all occupants.

Meridian is a registered trademark of Meridian Audio Ltd.
Trifield and the “three fields” device is a trademark of Trifield Productions Ltd.
Features and their availability may differ by vehicle specification and market.
SAFETY

ADVANCED DRIVER ASSISTANCE

F-TYPE’s technology is designed to keep you safe and take the stress out of driving. It can help with everything from reducing the chance of a motorway collision to avoiding minor bumps in a car park. This range of advanced active and passive safety systems give you the reassurance, information and control to focus on the pleasure of the drive.

PARKING AIDS
Front and Rear Parking Aid helps make manoeuvring even easier. When you select Reverse, or choose to activate them manually, sensors located in the front and rear bumpers are triggered. As you park, the Touch Pro display and audio feedback indicates how close you are to obstacles.

PARK ASSIST
Our Park Assist system makes parallel parking in a tight spot easier than ever by steering your car into a suitable space. You just have to select the appropriate gear and control the car’s speed. Park Assist will also steer you out of a space, taking all of the stress out of parking. Graphics and notifications guide you through both manoeuvres.

REAR CAMERA
Rear Camera provides improved visibility when reversing. Guiding lines representing the vehicle’s outer perimeter and predicted path are superimposed onto the rearward image displayed.

For more details on feature availability refer to page 81 or configure your vehicle at jaguar.in For information on airbags refer to page 76.
EMERGENCY BRAKE ASSIST
If the brakes are applied rapidly, this system boosts braking force to the maximum for shorter stopping distances. It can also help retain greater steering control in unexpected situations.

LED FRONT LIGHTING SYSTEM
This system automatically provides the best possible illumination in all driving situations by adjusting F-TYPE’s headlight beam to your speed and the weather conditions. At slower speeds it widens the low beam to illuminate your peripheral vision, helping you to see pedestrians and junctions. At higher speeds the system raises and narrows the low beam for extended visibility.

PEDESTRIAN CONTACT SENSING SYSTEM
Help protect the people outside your car as well as those inside. If the car makes contact with a pedestrian, our industry-leading Pedestrian Contact Sensing System is designed to automatically raise the bonnet to help cushion a potential impact.
THE THEATRE OF DREAMS
SPECIAL VEHICLE OPERATIONS

SPECIAL VEHICLE OPERATIONS (SVO) assembles and hand finishes halo models and limited run collector’s editions, including the new F-TYPE SVR. Each one showcases the best of Jaguar with stunning performance, exceptional luxury and cutting-edge technology. With a dedicated team of designers, engineers and technicians, SVO takes precision engineering to new heights and offers the opportunity for more individuality, choice and personalisation. A car from SVO is the ultimate expression of Jaguar.

SVO is based at a brand new Technical Centre in Warwickshire, England. This 20 000 m² specialist manufacturing facility has been established to enable our most discerning clients to indulge their passion for Jaguar. Our state-of-the-art facility features over 40 engineering inspection bays, a commissioning suite and an environmentally sustainable world-class paint facility.

F-TYPE is now available with an optional range of specially formulated, ultra metallic premium palette of 18 colours and finishes. These latest high technology colours and finishes are applied at our state-of-the-art SVO facility. All ultra metallic colours come in a gloss finish or, as an additional option, satin matte finish (See pages 86-87).
THE CONCEPT OF F-TYPE SVR

STATE-OF-THE-ART MATERIALS | ADVANCED AERODYNAMICS

F-TYPE SVR is designed and engineered at Special Vehicle Operations where our highly skilled engineers and aerodynamics experts have scrutinised every possible component to maximise F-TYPE SVR’s performance. In both Coupé and Convertible form, it is the ultimate F-TYPE. State-of-the-art materials and advanced aerodynamic design push F-TYPE beyond the extraordinary with an exceptional powertrain that makes F-TYPE SVR our fastest production car ever. Delivering supreme performance, ride and handling, F-TYPE SVR creates once-in-a-lifetime driving experiences – every day.

F-TYPE SVR’s lightweight All Wheel Drive with Intelligent Driveline Dynamics (IDD), delivers the engine’s power with efficiency and control. The 5.0 l V8 engine has been recalibrated to produce 423 kW and 700 Nm of torque, with a power-to-weight ratio of 245 kW/tonne. It will take you from 0-100 km/h in just 3.7 s and on to a top speed of 322 km/h.* But it is about more than numbers, more than just a machine. Jaguar makes performance an art.

F-TYPE SVR is our latest masterpiece.

*Coupé only.
F-TYPE SVR AERODYNAMICS

MAXIMISED CAPABILITY | ADJUSTABLE DOWNFORCE

F-TYPE SVR’s performance is not expressed by its exterior design: it is created by it. Form follows function in every swooping curve and finely drawn line. Each unique styling element, down to the smallest, subtle detail, improves F-TYPE SVR. Its advanced aerodynamic design offers less drag and higher levels of downforce. As a result F-TYPE SVR slices cleanly through the air, achieving rapid acceleration and effortlessly efficient cruising. Strong downforce improves stability and handling, road holding and dynamic capability.

FRONT INTAKES AND SPLITTER
Unique large lower bumper intakes maximise airflow for cooling of both the engine and brakes for improved performance. A precision splitter designed specially for F-TYPE SVR directs airflow into the car for optimum cooling. It also creates downforce at the front of the car to balance the rear wing.

BONNET LOUVRES AND SIDE POWER VENTS
Uniquely shaped louvres maximise airflow through the engine bay. This aids cooling, so the engine can operate at the highest level. Air from the wheel housing is released through side power vents which manage airflow around the wheel arch to minimise drag and improve F-TYPE SVR’s efficiency.

ENHANCED COOLING
F-TYPE SVR’s cooling system has been enhanced with significant improvements to airflow. To achieve this, the auxiliary radiator has been relocated, while the bumper beam profile and inlet trumpet size have been reduced. This increases the full performance envelope on F-TYPE SVR for greater endurance in extreme driving situations.
AERODYNAMIC WING
The aerodynamic wing is integral to F-TYPE SVR’s enhanced performance. Compared with the standard F-TYPE Coupé’s rear wing, F-TYPE SVR produces more downforce but crucially less drag. The wing is more elevated and wider than the standard F-TYPE Coupé’s spoiler, enabling it to act over the whole width of the car rather than just the width of the boot lid.

Air passes both over and under the wing, allowing Bernoulli’s principle to act in the car’s favour – faster moving air underneath the wing is at a lower pressure than that passing over the top, resulting in additional downforce.

F-TYPE SVR’s wing operates in two different positions:
On F-TYPE SVR Coupé the aerodynamic wing deploys at 113 km/h and stows at 80 km/h. On F-TYPE SVR Convertible the aerodynamic wing deploys at 97 km/h and stows at 64 km/h.

DEPLOYED WING
When F-TYPE SVR’s wing is deployed it increases downforce for greater stability and improved handling at top speed. In this position the wing gives a drag coefficient reduction of 2.5 percent and a lift coefficient reduction of 15 percent.

STOWED WING
For maximum top speed (V-Max), the wing is stowed to reduce drag. It works in conjunction with the front spoiler and other aerodynamic enhancements to bring a drag coefficient improvement of 7.5 percent and lift coefficient reduction of 45 percent.

V-MAX
In order to achieve 322 km/h* you must consciously prepare your F-TYPE SVR. Select ‘Dynamic Mode’ and press the deployable aerodynamic wing switch for 3 seconds to enable V-Max Mode. While active, a permanent symbol appears on the instrument cluster. In this mode the spoiler remains stowed at all speeds keeping drag to a minimum.

REAR UNDERFLOOR AND DIFFUSER
The smooth rear underfloor reduces drag, whilst the rear diffuser works with the rear underfloor to manage airflow, adding to F-TYPE SVR’s stability.

---

*Coupé only.
F-TYPE SVR
LIGHTWEIGHT TECHNOLOGIES

Weight is the enemy of performance. So we designed F-TYPE SVR to be as lean as possible. Every gram has a reason to be there. Every milligram saved gives you more rapid acceleration, more agile handling and sharper braking. Yet the interior still offers comfort and luxury in equal measures. F-TYPE SVR has the capability to make performance effortlessly enjoyable.

FORGED ALLOY WHEELS
F-TYPE SVR’s bespoke Forged alloy wheels are fitted with unique Pirelli P ZERO™ tyres. Its tyres are 10 mm wider than standard F-TYPE tyres, for improved handling and grip. While the striking Forged alloys offer a 13.8 kg overall weight saving.

REAR KNUCKLES
F-TYPE SVR has a larger rear bearing that contributes towards an increased stiffness of up to 37 percent over conventional F-TYPE knuckles. This enables the car to handle even higher lateral g-forces.

TITANIUM EXHAUST
The lightweight Titanium and Inconel® exhaust system saves 16 kg. With its SVR badged tailpipes, it not only looks unique, it sounds unique – F-TYPE SVR is recognisable by the distinctive rumble of its exhaust.
F-TYPE SVR INTERIOR

Just as no detail of F-TYPE SVR’s engineering and exterior design has been overlooked, its interior is testament to the SVO division’s attention to detail. The moment you open the door, the SVR treadplate shows that you are entering a special space.

Exclusive materials are everywhere you look, from fine contrast stitching to ultra-modern finishes that create a sense of total luxury. The SVR badged steering wheel with larger aluminium anodised gearshift paddles offers the perfect connection to the road and the quilted Performance seats offer comfort and support while you enjoy the dynamic drive.

ROOF STYLES

F-TYPE offers a range of different roofs to suit your own personal style. Each delivering their own distinctive characteristics, they provide a powerful expression of individual flair both inside the cabin and to the outside world.

ALUMINIUM ROOF
For the pure Coupé look, F-TYPE’s aluminium roof is as strong and lightweight as the rest of the vehicle. It provides the ideal complement in colour, style and line to the powerful F-TYPE profile. The aluminium roof expresses F-TYPE in its clearest sports car form.

PANORAMIC GLASS ROOF
Introducing even more natural light and airiness to the interior, a full width panoramic glass roof is optional on F-TYPE Coupé models. For increased seclusion, should it be required, the roof features a manually sliding ‘blackout’ blind, which can screen the occupants from up to 99 percent of the incoming light.

CARBON FIBRE ROOF*
With Carbon Fibre outer and inner panels bonded together to create a strong yet light roof structure, F-TYPE Coupé’s optional Carbon Fibre roof is 20 percent lighter than the standard aluminium roof. It features Carbon Fibre weave visible through a deep, high-grade lacquered finish.

CONVERTIBLE ROOF
F-TYPE Convertible’s lightweight fabric roof is available in a choice of four colours. Acoustically enhanced with composite fabric to reduce noise, it features a flush fitting heated glass rear window. The roof can be raised or lowered in just 12 seconds and operated fully automatically at speeds of up to 50 km/h.

*Please consult your local Jaguar Retailer for availability.

VEHICLE SHOWN: F-TYPE R IN YULONG WHITE WITH SILVER WEAVE CARBON FIBRE PACK

*Coupé only.
Side Net*
T2R22934
Side net provides additional enclosed storage in the luggage compartment and helps to secure loose items such as bags or small parcels.

Flexible Luggage Retainer
C2D20903
Provides a neat stowage solution to help secure luggage or other items within the luggage compartment.

Personalised Illuminated Sill Treadplates
T2R6091
Elegantly styled stainless steel sill treadplate finisher for driver or passenger doors. Illuminate when either the driver or passenger doors are opened. Highlighted by soft Phosphor Blue lighting. Allows you to specify a monochrome ‘motif’ in a choice of approved typefaces/scripts.

Luxury Carpet Mats
T2R16571PVJ – Right Hand Drive
Luxurious, tailored 2 050 g/m² pile front carpet mats with embossed Jaguar logo and Nubuck edge binding. The luxury mats provide a well appointed finishing touch to the interior.

Aluminium Gearshift Paddles
T2R6547MMU
Replacement steering wheel gearshift paddles offered in a premium aluminium material providing a high quality finish to a key contact point in the vehicle. Manufactured from billet machined aluminium, the paddles are hand brushed for a premium finish and anodised to ensure they will not deteriorate with wear.

Illuminated Sill Treadplates
T2R6090
Elegantly styled stainless steel sill treadplate finisher for driver or passenger doors. Illuminate when either the driver or passenger doors are opened. Highlighted by soft Phosphor Blue lighting.

Illuminated Sill Treadplates
T2R6091
Elegantly styled stainless steel sill treadplate finisher for driver or passenger doors. Illuminate when either the driver or passenger doors are opened. Highlighted by soft Phosphor Blue lighting.

Aluminium Gearshift Paddles
T2R6547MMU
Replacement steering wheel gearshift paddles offered in a premium aluminium material providing a high quality finish to a key contact point in the vehicle. Manufactured from billet machined aluminium, the paddles are hand brushed for a premium finish and anodised to ensure they will not deteriorate with wear.
Silver Weave Carbon Fibre Mirror Covers
T2R25196 - Left Side  T2R25195 - Right Side
High-grade Silver Weave Carbon Fibre mirror covers provide a performance-inspired styling enhancement. Featuring a 2x2 twill weave with an eye-catching aluminium thread and a High Gloss lacquered finish.

Silver Weave Carbon Fibre Side Power Vents
T2R25198 – Left Side  T2R25197 – Right Side
High-grade Silver Weave Carbon Fibre side power vents provide a performance-inspired styling enhancement. Featuring a 2x2 twill weave with an eye-catching aluminium thread and a High Gloss lacquered finish.

Gloss Black Side Power Vents
T2R5996 – Left Side  T2R5995 – Right Side
Jaguar branded Gloss Black side power vents provide a dynamic exterior styling enhancement.

Silver Weave Carbon Fibre Bonnet Louvres
T2R25193 - Left Side RWD  T2R25191 - Right Side RWD
T2R25194 – Left Side AWD  T2R25192 – Right Side AWD
High-grade Silver Weave Carbon Fibre bonnet louvres featuring a 2x2 twill weave with aluminium thread and a High Gloss lacquered finish. Provides an eye-catching, performance-inspired styling enhancement coupled with the weight-saving benefits associated with carbon fibre.

Silver Weave Carbon Fibre Roll Hoops
T2R23379 – Left Side  T2R23378 – Right Side
High-grade Silver Weave Carbon Fibre roll hoops featuring a 2x2 twill weave with aluminium thread and a High Gloss lacquered finish. Provides an eye-catching, performance-inspired styling enhancement coupled with the weight-saving benefits associated with carbon fibre.

Wind Deflector T2R11321
Simple to fit and remove, the wind deflector reduces air draught and turbulence in the passenger compartment, even at high speeds. Supplied with a Jaguar branded stowage bag.

Jaguar branded Gloss Black side power vents provide a dynamic exterior styling enhancement.
Chrome Bonnet Louvres\(^4\)  
T2R5277LML – Left Side  T2R5276LML – Right Side  
Bright finish accents highlight the F-TYPE exterior styling cues.

Chrome Mirror Covers  
T2R5399 – Left Side  T2R5400 – Right Side  
Chrome mirror covers accentuate the stylish design of the exterior mirrors.

Chrome Roll Hoops\(^1\)  
T2R5402 – Left Side  T2R5401 – Right Side  
Bright finish accents highlight the F-TYPE exterior styling cues.

All-Weather Car Cover  
T2R4364  
All-weather tailored cover for the F-TYPE with the Jaguar logo. Protect your F-TYPE from the elements, including showers, frost and dust. Quick and easy to fit.

Rear Mounted Ski Carrier  
T2R13769 – V6  T2R13887 – V8  
Carrying up to two pairs of skis of up to 1.9 m in length, this lockable carrier has been designed to ensure skis remain at ambient temperature in transit with minimal wind noise and resistance. Mounting mechanism has been positioned discreetly beneath the rear bumper ensuring a clean finish when the carrier mounting arms are removed. Following initial retailer installation the carrier can be removed easily in a matter of minutes.

Gloss Black Grille  
T2R13838 – Without Parking Aids  T2R13839 – With Parking Aids  
Provides a High Gloss Black finish to the grille surround and bumper beam accentuating the F-TYPE's dynamic appearance.

\(^1\)N/A with F-TYPE SVR.  
\(^2\)Available for F-TYPE Convertible only.  
\(^3\)Standard on F-TYPE R and F-TYPE SVR. Also available as a line fit option.  
\(^4\)Not applicable for AWD models.

THE WORLD OF JAGUAR

Choose F-TYPE and you’re joining the exciting World of Jaguar.

ICE DRIVE EXPERIENCES
Take your driving to the next level with the Jaguar Land Rover Ice Drive Experience. From 2017, we are offering an adventure in Arjeplog, Sweden, that will test and develop your performance driving skills in extreme conditions. It’s a rare chance for owners and enthusiasts to tackle some of the harshest and most challenging tracks on earth, under the skilled guidance of our experts. Our driving instructors are of the highest-calibre and will be with you every step of the way – ready to impart years of driving wisdom. You will dance on ice, glide around some of the most awe-inspiring corners imaginable and realise the true exhilarating potential of Jaguar and Land Rover.

If you’d like to be part of the next adventure, find out more by visiting jaguar.in/experience-jaguar/ice-drive-plus

FORMULA E
Jaguar’s reputation for performance, technology and design was forged by the world’s most challenging circuits and championships. From Le Mans to Formula 1, and now Formula E, the grid is our test-bed. Formula E provides the perfect proving ground for electric vehicle technology in a high performance environment. The racing series accelerates the development of Jaguar’s electric powertrains. With every race, Formula E helps Jaguar engineers create better electric vehicles.

BEHIND THE SCENES
Our factory tours give you the unique opportunity to experience the whole process of how our cars are brought to life – from the moulding of sheet metal to those intricate final touches. At our state-of-the-art production facilities, you’ll get to see how skilled technicians and sophisticated machines work seamlessly together to perfect some of Jaguar’s most breathtaking cars.

TRACK DAYS
There’s no better way to get to know Jaguar than by taking a drive. The Jaguar Experience offers a range of unique opportunities to really find out what it feels like to get the most out of a Jaguar. Our track experiences allow you to push yourself and cars from the incredible Jaguar range to the limit.

JAGUAR COLLECTION
The latest range from the Jaguar Collection has been crafted with the same design execution and attention to detail that goes into all of our cars. This is evident in our clothing range, premium leather items and luxury travel goods. To celebrate Jaguar’s heritage, we also have a collection that honours past achievements and features race inspired gift items and apparel.

To find out more, visit the online shop at jaguar.in/experience-jaguar/BG

JAGUAR MAGAZINE
This is our own vibrant, cosmopolitan and contemporary magazine. Produced by a team of enthusiastic designers and feature writers, it goes behind the scenes at Jaguar as well as providing insight into the world of luxury, design, style and travel. You can enjoy Jaguar Magazine twice a year completely free of charge for the first three years. Ask your Jaguar Retailer to ensure that you receive your copy.
AT YOUR SERVICE

As well as providing a range of exclusive services and lifestyle products, the World of Jaguar makes owning and driving carefree and easy.

GENUINE PARTS
Jaguar Genuine Parts are designed, tested and manufactured to our uncompromising standards for quality, fit and durability. Each part is engineered specifically for your F-TYPE to contribute to optimum performance and to help maximise its lifespan.

FLEET & BUSINESS
Jaguars are dynamic and distinctive cars that help companies express the unique character and personality of their business. We are committed to providing customer-focused aftersales services, ensuring that every Jaguar performs to the highest standard and in the most cost-efficient way for businesses. Visit jaguar.in/fleet-and-business for more information.

JAGUAR ASSISTANCE
Jaguar Assistance provides assistance in motoring emergencies, from immobilisation due to breakdown or accident to minor problems such as punctures. You can rely on our roadside assistance, whatever the situation, wherever you happen to be.

JAGUAR FINANCIAL SERVICES
New or used, for personal or business use, we have a finance option that puts you in complete control. Please speak to your local Jaguar Retailer to find out more.

INSURANCE
F-TYPE’s key components are easily accessible for time-efficient service and repair costs. With a focus on lower repair costs, F-TYPE delivers competitive insurance group ratings. To find out more about the compelling business case for F-TYPE, please contact your local Jaguar Retailer.

IMPORTANT NOTICE
Jaguar Land Rover Limited is constantly seeking ways to improve the specification, design and production of its vehicles and alterations take place continually. While every effort is made to produce up-to-date literature, this brochure should not be regarded as an infallible guide to current specifications, nor does it constitute an offer for the sale of any particular vehicle. Distributors and Retailers are not agents of Jaguar Land Rover Limited by any express or implied undertaking or representation. Comparisons are based on manufacturer's own data and testing prior to publication.

COLOURS
The colours reproduced here are subject to the limitations of the printing process and may therefore vary slightly from the actual vehicle. The company reserves the right to alter or withdraw any colour finish without notice. Some of these colours may not be obtainable in your country. Please check availability of colours and current specifications with your Jaguar Retailer. Distributors and Retailers are not agents of Jaguar Land Rover Limited and have absolutely no authority to bind Jaguar Land Rover Limited to any express or implied undertaking or representation.

ENVIRONMENTAL INNOVATION AT JAGUAR
Jaguar is committed to reducing dependency on fossil fuels, using fewer natural resources and creating less waste as part of our approach to responsible and sustainable business development.
